To whom it may concern:

I fully endorse Susan Houck for any type of manuscript preparation, including those with difficult equations. Unlike younger faculty, I do not type. I retired from the Aerospace and Mechanical Engineering Department at the University of Oklahoma in 1999. For some years before that Susan did the typing of my journal articles. This work culminated in her typing a camera-ready 790 page fluid dynamic text, published by the CRC press. Susan is conscientious, prompt and an accurate typist. It was a pleasure working with her.

Professor George Emanuel  
Mechanical and Aerospace Engineering
